

Retail Solutions

Features & Benefits of Code readers:

- Reads all 1D and 2D bar codes
- High speed, omnidirectional bar code reading
- Fast, reliable bar code reading off mobile devices
- Multiple good read indicators: LED, audible tone and vibration
- Extremely low power requirements
- Lightweight, ergonomic and easy to use
- Plug 'n Play functionality, for a true out of the box experience
- Motion detection and continuous scan modes
- Data editing and parsing for easy integration into enterprise solutions
- Extended service plans

Overview

Code bar code readers have been designed to maximize productivity in a retail environment. With a focus on quick scanning and durability, Code bar code reading solutions can be integrated into all areas of the retail environment, from warehouse and distribution to point-of-sale and self-serve kiosks.

Code offers a full line of tethered readers, wireless readers, and scan engines that are compact, rugged, and feature a high performance optical platform that makes bar code reading extremely fast and reliable. Code bar code readers have significantly low power requirements, thus limiting the battery drain on POS systems and reducing overall costs when deployed throughout an enterprise. Additionally, Code readers are designed to be ready to use, right out of the box for seamless integration to any POS system, network and information system.

Code bar code readers are rich with patented technologies to give retailers the best return on their investment. Code's glare reducing technology makes reading bar codes on shiny surfaces, mobile devices, or curved surfaces, quick and easy, while the dual-field optics of a Code reader allow users the flexibility to read both standard and sub-standard 1D and 2D bar codes with a single device.

To further enhance customer service and increase efficiency, Code readers can be used as either a hand-held scanner or in hands-free mode and are compact, lightweight enough to be carried continuously on the retail floor or warehouse.

Code is committed to excellence. Our dedication to providing an outstanding level of service and forging close working relationships with our customers has enabled us to establish an outstanding reputation for service and support, something we call CodeOne. CodeOne offers customers a variety of service and support options designed to make the most of your hardware investment. Everything about CodeOne Service Plans are designed to help keep Code hardware, and the businesses we serve, running smoothly and efficiently.

Retail Solutions Bar Code Readers

CR1400 Bar Code Reader

Features & Benefits

- High speed, omnidirectional reading of 1D, 2D, Postal bar codes and OCR
- Dual field optics, both high density and wide field in the same unit
- Glare reduction technology for reading codes on shiny surfaces
- Manual or automatic triggering
- 3 programmable indicators: vibration mode, LED and audible tone
- Comes with universal stand
- Reads bar code reliably off cell phone screens
- Compatible with Code's Cortex™ software configuration utility
- Data editing and parsing
- Extremely low power consumption
- IP54 housing
- Available in white or grey
- Standard warranty: 5 years

CR1000 Bar Code Reader

Features & Benefits

- High speed, omnidirectional reading of 1D, 2D, Postal bar codes and OCR
- Dual field optics, both high density and wide field in the same unit
- Glare reduction technology for reading codes on shiny surfaces
- Manual or automatic triggering
- 3 programmable indicators: vibration mode, LED and audible tone
- Reads bar code reliably off cell phone screens
- Compatible with Code's Cortex™ software configuration utility
- Data editing and parsing
- Uses Code's new rapid disconnect Affinity™ cables
- Extremely low power consumption
- IP54 housing
- Standard warranty: 2 year

CR4100 Bar Code Reader

Features & Benefits

- Dual field optics, both high density and wide field in the same unit
- Reflection and glare reducing illumination technology
- Integrated 2D imaging engine
- Dedicated, high-speed microprocessor for decoding bar codes
- Windows® Mobile 6.5.1 Operating System
- Remote management ready
- QWERTY keypad
- WiFi 802.11 a/b/g
- Bluetooth® 2.0 – Class II
- IP65 rated
- WWAN (HSDPA)
- Standard warranty: 3 years
